

PAINTS MADE TO LAST IN THE FLORIDA SUN

MILDEW PREP

#99-000

DESCRIPTION: A proprietary blend of mildewcides, algaecides, cleansing acids and wetting agents that when mixed in the proper ratio with sodium hypo-chloride will accelerate the termination of mildew and algae as a pre treatment prior to painting a surface. A unique value to this solution is that it can be used as an intermediate sanitizing solution over previously painted or unpainted surfaces. MILDEW PREP will destroy the foundation of mildew/algae growth and leaves a residue (barrier coat) that will protect the substrate against the future growth of mildew.

APPLICATION: Always apply a small test area before use to check color fastness of surface. Apply with a tank type sprayer or other type pump. Spray infected surfaces liberally; Heavy mildew may require a second application. Coverage area 400 square feet per gallon. May also be applied by brush or, roller. See CAUTIONS. **DO NOT** apply when temperature is below 50 degrees. Stir and mix thoroughly prior to use.

USES: Formulated for tropical climate conditions. Excellent for use as a pre treatment for mildew, algae, and / or bacterial growth that must be killed, sanitized, and removed prior to painting. Excellent for use on a variety of surfaces to combat and control mildew growth.

This product can also be used in conjunction with a preventative maintenance program where by when applied to a surface it will remove growth and leave a residue that will keep on destroying the spores that facilitate the growth of mildew and algae.

MIXING RATIO

For use as a pre-treatment:

1 quart Mildew Prep, three quarts chlorine, 4 gallons water- yields five gallons
5 gallons Mildew Prep, 15 gallons chlorine, 80 gallons water yields 100 gallons

For use as a retarder and cleaner DO NOT RINSE, DO NOT PAINT

2 quarts Mildew Prep, 3 quarts chlorine, 3 gallons 3 quarts water yields 5 gallons
10 gallons Mildew Prep, 25 gallons chlorine, 65 gallons water yields 100 gallons

* The amount of chlorine may be increased if severe mildew is present.

CAUTION **HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS** Use safety goggles and rubber gloves, avoid contact with skin, eyes or clothing. Harmful if swallowed. Avoid breathing vapors or spray mist. Do not use in confined areas without proper ventilation. **FIRST AID** If swallowed, drink promptly large amounts of water. In case of contact immediately flush eyes or skin with copious amounts of water. For eyes immediately contact a doctor and get medical attention. **ENVIRONMENTAL HAZARDS** This product is toxic to fish. Do not apply directly to water. Do not contaminate water when disposing of wash water or run off. Do not reuse container. Check with local laws governing disposal of containers and product.

**** Cover all vegetation and thoroughly rinse with clean water prior to and after application. This product may harm vegetation use care on shrubbery, grass, flowers, and plants. Pot life is approximately 3 hours, mix amount that may be use in that time frame only.**.99-000/udata
