

QUICK- CURE Rx

FRESH MASONRY CURING COMPOUND

WATERPROOFING PRIMER

HYDROSTATIC PRESSURE RESISTANT

Prevents chloride penetration thus, carbonization of Rebar

Superior resistance to alkali and efflorescence on Fresh (green) masonry.

High solids to "fill in "typical application cracking of stucco

Waterproofing and wind driven rain resistance *(ASTM-D-7088),

Hydrostatic pressure resistant (ASTM-D-7088),

Excellent adhesion to all types of concrete or stucco

Environmental friendly low VOC

PROVIDES

FAST PACE CONSTRUCTION PRACTICES

LONG TERM PROTECTION OF STEEL REBAR

WATERPROOFING AND CURING OF MASONRY

FAIL SAFE BARRIER PRIMER WHEN APPLIED TO FULL OPACITY

WATER PROOF BARRIER PRIMER

Alkali and efflorescence resistant blocking primer

Long term protection steel rebar protection

Prevents chloride penetration into NEW masonry

Environmentally friendly lowVOC an Odorless

Hydrostatic pressure resistance ASTMD-7088

Uniform porosity of masonry for finish coat holdout.

Curing compound to avoid application cracking

Formulated to penetrate into concrete to create a waterproof , hydrostatic barrier primer

Pvc 30-40 %|||| 60uMDFT Micro = .06 mills or 6 mils dry

STUKO-CURE; FAST-PRIME; MASONRY PROOF; CRETE –GUARD; HYDRO-PROOF. ?????
